

Lumiglas Sight Glass Wiper SW I

for circular sight glass assemblies to DIN 28120 or similar as well as screwed sight glass assemblies

• Installation:

Into sight glass disc with 10.5 mm central hole (to DIN 7080/8902 or similar, suits sight glass assemblies to DIN 28120 from nominal size DN 50 to DN 400 as well as screwed sight glass assemblies similar to DIN 11851, DN 50, 65, 80, 100, 125, 150.

Application:

For manual cleaning, when required, of inside glass surface in sightports.

• Operating conditions:

Vacuum tight; pressure tight to at least 2 bar and, depending on glass diameter, to 6 bar. Max. permissible temperature 220°C (though this depends on glass type used).

Possible combinations:

Unit can simultaneously be combined with a spray device. Combination with Lumistar luminaire mounted on the sight glass unit is possible from viewing dia. 125 (DIN 28120, DN 100) depending on luminaire size (see table overleaf). Lumistar luminaire series USL and ESL can also be combined with the unit. With screwed sight glass assemblies combination with Lumistar luminaire SLM or Lumistar ME is possible with size DN 125. Also available with ratchet-drive lever.

Certification/testing:

Certification issued by the state material testing authority of Nordrhein-Westfalen, Dortmund, are available.

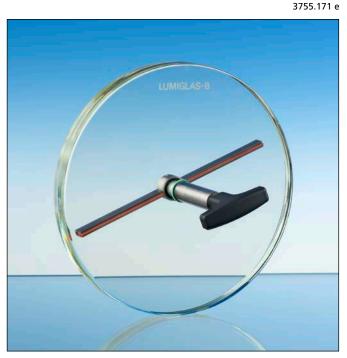

Assembly and material alternatives for the complete supply:

Item art

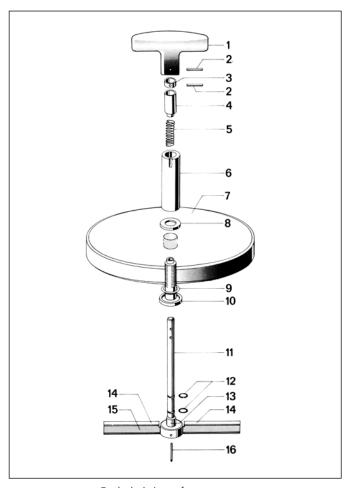

- 1 T grip (or ratchet-drive lever at extra cost)
 - Polycarbonate (bush brass)
- 2 locating pins 1.4310
- 3 spacer collar locating brass or PEEK
- 4 spacer collar with spigot brass or PEEK
- 5 compression spring 1.4310
- 6 bush threaded female 1.4401
- 7 glass disc Sodalime or Borosilicate
- 8 gasket non asbest fibre, BAS 400 green
- 9 O-ring seal Viton
- 10 bush threaded female 1.4401 or 1.4404
- 11 wiper spindle 1.4401 or 1.4404
- 12 O-ring seals Viton
- 13 bearing sleeve PTFE
- 14 wiper blade silicon, PTFE or EPDM
- 15 wiper arm 1.4571
- 16 locating pin 1.4310
- drive lever 1.4305
- lever knob Polycarbonate (bush brass)
- freewheel unit steel
- drive boss 1.4305
- dust cab synthetic resin
- all product contact parts stainless steel

• Fitting and assembly instructions:

If the wiper is ordered separately, i. e. not installed into sight glass disc by the manufacturer, the assembly has to be done with regard to separate installation an operating instructions, attached to the delivery.

• Ordering Information:

e. g. Lumiglas sight glass wiper SW I, size 3, wiperblade PTFE. If a sight glass disc is needed as well, please specify the following data:

- Borosilicate or soda lime glass
- Sight glass disc size (diameter x s)
- nominal fittings diameter DN
- effective operating pressure for this vessel
- for wiper blades sizes 9 and larger, please specify the inside diameter of the fitting

• Note:

A sight glass disc is not automatically included in the supply. Please order sight glass disc separately.

All dimensions in mm unless stated otherwise. Subject to change without prior notice. 09.15

¹ Data valid only for borosilicate glass

Lumiglas sight glass wiper with flexible drive SW II BW

for use with circular sight glass assemblies to DIN 28120 or similar

• Mounting:

By means of pressure tight glands through both base and cover flange of sight glass assembly; suitable for sight glass discs corresponding to DIN 7080 or DIN 8902.

• Application:

For manually activated cleaning, when required, of inside face of glass in sight ports. Particularly suitable for pressure and vacuum, vessels requiring test certification both in explosion hazardous as well as non hazardous operating areas.

The glass discs fitted into the assemblies correspond to DIN 7080 or DIN 8902 standards.

Suitable for circular sight glass assemblies nominal size DN 100 ... DN 200.

Operating conditions:

Vacuum tight; pressure tight to 16 bar. Max. permissible temperature: 220°C (depending, however, on type of glass disc used).

• Possible combinations:

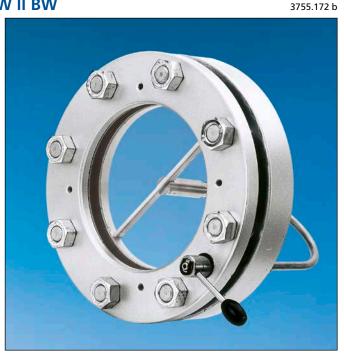

Simultaneous fittings of Lumistar luminaire, flame proof or standard design, is possible with the wiper SW II BW, as is the fitting of a spray device.

• Certification/Testing:

Test certificates issued by the state material testing authority Nordrhein Westfalen, Dortmund, are available.

• Assembly/materials alternatives for the complete supply:

Wiper blade: PTFE or silicone rubber All product contact parts are of stainless steel. Mechanical drive internal seal: PTFE

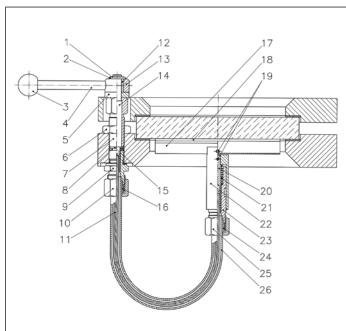

Lumiglas SW II BW mounted into sight glass fitting DIN 28120

Assembly and installation instructions:

The wiper is actuated by flexible shaft which engages at one end in the wiper blade holder and at the other in a lever operated ratchet drive mechanism which ensures drive shaft is always rotated in same direction.

A separate set of detailed installation instructions is included in the supply.

Should you order a complete sight glass assembly with the wiper SW II BW, the additional machining of the base will be carried out by Papenmeier.

Item Part

- 1 Locking circlip 1.4568
- 2 Washer A2
- 3 Actuating knob (brass insert)
- 4 Ratchet drive lever arm 1.4305
- 5 Spacer ring 1.4305
- 6 Locknut A4
- 7 Threaded bush 1.4301
- 8 Packing ring PTFE
- 9 Tube securing bush 1.4571
- 10 Compression nut 1.4571
- 11 Flexible drive shaft 1.4310 or 1.4401
- 12 Ratchet drive unit steel
- 13 Drive boss 1.4305
- 14 Shaft drive shank 1.4305

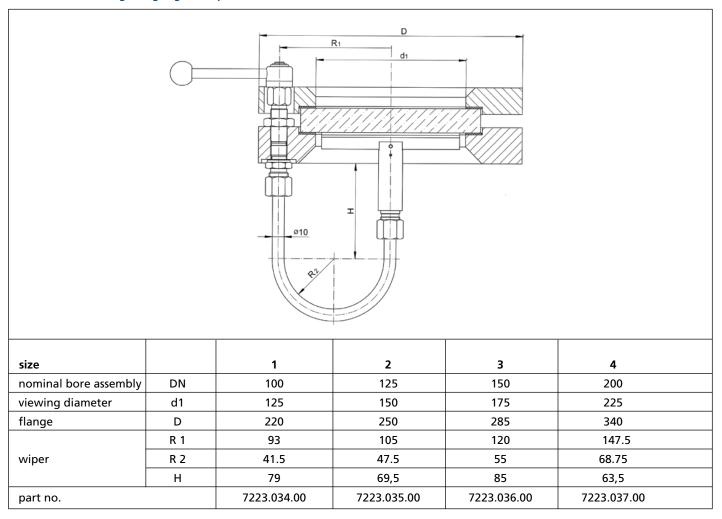

Item Part

- 15 Washer galvanized steel
- 16 Compression taper ring 1.4571
- 17 Wiper blade holder 1.4571
- 18 Wiper blade siliconee or PTFE
- 19 Roll pin 1.4571
- 20 Wiper arm axle 1.4571 or 1.4401
- 21 Coil spring 1.4310
- 22 Wiper carrier shroud 1.4571 or 1.4401
- 23 Guide spigot 1.4571 or 1.4401
- 24 Compression taper ring 1.4571
- 25 Compression nut 1.4571
- 26 Guide tube 1.4571

• Order data:

e. g. Lumistar sight glass wiper SW II BW, size 3, wiper blade silicone rubber.

If ordering with complete sightport assembly please give the following additional information:

- 1. Sight glass assembly (DN/PN), materials.
- 2. Type and size of sight glass disc (borosilicate/sodalime).

All dimensions in mm unless stated otherwise. Subject to change without prior notice. 09.15

Lumiglas Spray Device

• for circular circular sight glass fittings to DIN 28120 and similar

Pressure tight screwed gland nozzles, as supplied, pass through clearance hole in cover flange and tapped hole in base flange of sight glass assembly.

Application:

For intermittent or continuous automatic cleaning of underside of sight port glass disc. Suitable for pressure and vacuum vessels subject to pressure test certification for all standard ratings and use in explosion hazardous as well as non hazardous areas.

Operating conditions:

Correspond to sight glass fitting rating

Combination with other features:

Can be combined simultaneously with Lumiglas luminaire and wiper. Care must, however, be taken that max. permissible operating temperature and resistance to temperature cycling for the relevant glass disc are considered.

All metallic contact parts are of stainless steel quality 1.4571. Seals: PTFE

Scope of delivery:

Spray jet head, locknut, two seals, connecting nozzle 10 mm OD x 1.5 mm bore with hexagon shank and fitting instructions

Mounting:

When supplied as part of a complete sight glass assembly, the flanges are ready drilled and tapped to suit at the Lumiglas suppliers works.

Depending on operating requirements, the spray feed line may require a non return valve.

• Parts and materials referred to in adjoining diagram:

item	part	material
1	connecting nozzle	stainless steel, part no. 1.4571
2	seals	PTFE
3	locknut	stainless steel A4
4	spray head	stainless steel, part no. 1.4571

• Dimensions:

The spray device fits all standard sizes of sight glass assembly. Depending on application, two or more units may be fitted.

Ordering information:

Lumiglas spray device, part no. 1.1098.005.91

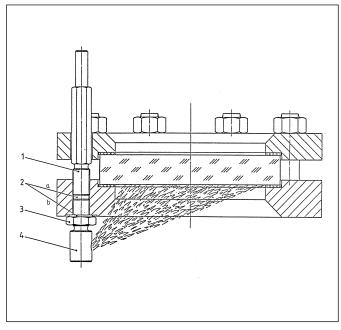

If ordering in combination with complete sight glass assembly, please indicate type of fitting and intended form of installation:

- 1. sight glass fitting (DN/PN), materials
- 2. dimensions and type of sight glass disc (borosilicate/sodalime glass)

Lumiglas spray device

Lumiglas spray device installed in a sight glass assembly DIN 28120

All dimensions in mm unless stated otherwise. Subject to change without prior notice. 09.15

specifically developed for connecting to various control elements in potentially explosive environments.

- Versatile, high-performance Ex-class motor drive with compact dimensions for numerous applications
- This data sheet also incorporates the installation and operating instructions

• Applications:

The Ex-class motor drive is mainly intended for operating wipers on sight glasses for short-term operation. For other applications it can also be used in long-term operation.

• Special advantages of the Lumiglas Ex-class motor drive:

Especially in environments that require the remote monitoring of processes in reactors (e. g. biogas plants), ex-type cameras are frequently mounted on sight glasses, enabling process engineers to observe what is going on in the vessel from a central control room, which is frequently located at some distance from the reactor itself.

This eliminates the need for physical presence at a reactor, frequently entailing safety-relevant situations made more difficult by adverse environmental conditions, e. g. bad weather.

In certain processes, problems can arise if there are deposits of the substance in the reactor on the sight glass screen, thus making it difficult or even impossible for the camera to view the process. This can be remedied by using one of the proven wipers from the Lumiglas range: SW I and SWII. These wipers are normally operated by hand when the observer wants to inspect the reactor.

In many cases, however, the remote observation of reactors, e. g. via Lumiglas camera technology, is mandatory, making it essential to install a motor-driven wiper that can be actuated remotely from the control room.

The Ex motor drive EMA I-Ex has been developed specifically for such applications.

Because remote observation is mainly carried out in potentially explosive environments, an Ex-class motor drive is now available in addition to the Ex camera.

• Small dimensions, great effectiveness:

The Ex-class motor drive is designed for both short-term and continuous operations.

• All development targets have been achieved:

Compact overall size; high turning moment; excellent motor power; low energy consumption.

The Ex motor drive is thus ideally suited for operating, for instance, Lumiglas screen wipers:

- a) SW I (the wiper blade axis passes through a hole in the sight glass) for low pressure
- b) SW II (the wiper blade axis is operated from the side through a hole in the sight glass fitting by means of a flexible shaft) – for higher pressure

Combination with a spray facility is also possible.

Lumiglas Ex motor drive

• General operating conditions:

- Approved for use in potentially explosive environments, zones 1 and 2 as well as 21 and 22
- Approved for use in ambient temperatures of between -20°C and +50°C

• Type of protection:

Terminal connection and motor enclosure IP68, motor shaft IP54

• Structure of compact unit:

The unit is made up of a DC electric motor with a flanged drive and special coupling by way of which (e. g.) the wiper axis of a screen wiper is turned.

Lumiglas

• Special characteristics of the individual components:

1. Motor

- Explosion-proof high-precision DC motor with non-ferrous armature
- High acceleration rate thanks to low weight of rotor
- High degree of efficiency (75% by 4.8 W power output) because there is no hysteresis loss
- Shaft supported on both sides by pre-stressed ball bearings
- Protected against excessive enclosure temperature: the motor is equipped with two non-resettable thermal fuses as protection; operation is also admissible with only one thermal fuse (see instructions for terminal connection)
- Type of protection: EEx d IIC T5
- Nominal voltage: 12 V DC
- Nominal current: up to 0.5 A continuous load at ambient temperature 40°C
- Direction of rotation: as required
- Connecting cable: 5 x 0.5 mm², 5 metres in length, fitted
- Material of motor enclosure: steel

2. Flanged drive

- Planetary gear set, reduction gear ratio (nominal) 159:1
- Turning moment: 2 Nm for continuous operations, 4 Nm for short-term operations
- Direction of rotation of shaft: reversible in direction of arrow
- Drive shaft bearing: ball bearings, pre-stressed
- Material: stainless steel

3. Helical coupling

- Material: aluminium (also available as a special version in stainless steel)

4. Mounting

- The individually adapted stainless steel fittings for use in pressure environments (SWI) and in normal environments (SW I) are shown in the illustrations opposite.

Ex-class motor drive combined with Lumiglas wiper SW II

Ex-class motor drive combined with Lumiglas wiper SW I

• Installation/Assembly

1. Mounting

To enable wiper operations, the compact Ex-class motor drive is affixed to the cover flange of a round sight glass fitting by means of a special adapter. Each mounting (stainless steel) is individually adapted and depends on

- a) the type and size of the sight glass fitting
- b) the type of wiper.

Please provide accurate details of the application in your enquiry!

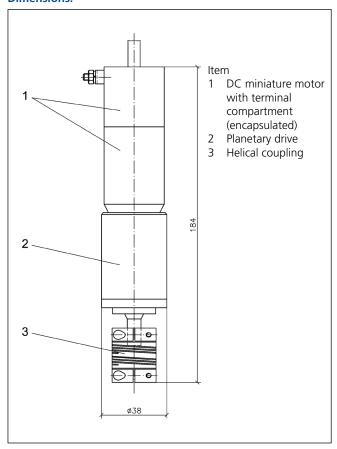

2. Coupling

- Once the mounting has been fastened to the planetary drive, the coupling is fitted on the drive shaft of the transmission and secured to the same with a hexagon socket screw.
- The wiper axis in then guided into the coupling. After that, the Ex-class motor drive is aligned with the attachment and mounted.
- Finally, when it has been positioned free of tension, the wiper blade axis is fixed over the hexagon socket screw.
- It is essential to avoid any strain when installing the coupling and the extension for actuating operating elements (wipers).

• Order data:

- Ex-class drive 12 V DC 0.5 A, part no. 3942.001.00
- Coupling, part no. 3065.001.00
- Ex-class terminal box, part no. 2507.020.00
- Non-Ex power supply unit 230 V AC / 12 V DC 0.42 A, part no. 9306.005.00

• Dimensions:

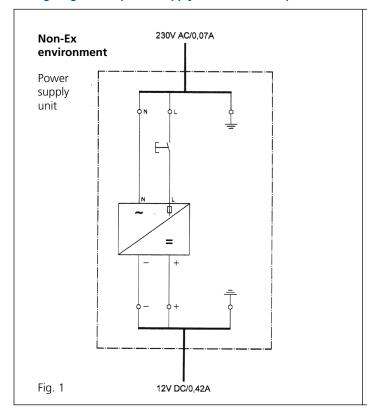

• Technical data:

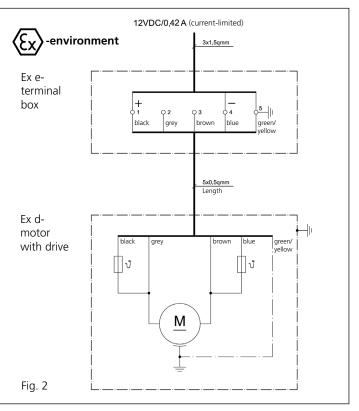

EC Type-Examination Certificate	PTB 03 ATEX 1131
Ignition protection type motor with drive	EEx d IIC T5 CE IIC GD 95°C
Explosion group	IIC (all explosion groups, includes explosion groups IIA and IIB)
Temperature classification	T5
Type of protection	Terminal connection and motor enclosure IP68, motor shaft IP54 acc. to EN 60529
Operating voltage	12V DC
Ambient temperature	-20°C ≤ Ta ≤ +50°C
Terminals (connecting cable fitted)	5 x 0.5 mm², cable 5 m
Nominal current	Up to 0.5 A continuous load at 40°C
Direction of rotation	User-defined
Speed	Approx. 13 rpm
Material: motor	Steel, zinc-plated, passivated
Material: drive	Stainless steel with anodised adaptor flange (aluminium)
Material: coupling	Aluminium 7075-T651
Weight	Approx. 1.1 kg

• Wiring diagram for power supply unit and Ex d wiper drive via terminal box:

Installation and Operating Instructions

• Essential precautions:

The Lumiglas Ex-class motor drive should only be installed, connected and serviced by staff who have been expressly trained and authorised for this purpose.

EC Type-Examination Certificate PTB03 ATEX 1131 must be complied with.

The operating permit for the equipment expires if it is used incorrectly.

Electrical termination

The electrical supply required is 12V DC / 0.42 A (current-limited). If this is not available on-site, a suitable power supply unit is obtainable (to be ordered separately).

When the Lumiglas Ex motor drive is used in potentially explosive environments, the voltage from the non-Ex area is laid to a special Ex-e terminal box to be installed in the explosive zone (to be ordered separately).

The supply voltage is conducted via a 3 x 1.15 mm² line to the Ex-e terminal box and wired to the terminals as follows (see also Fig. 2):

- + to terminal 1
- to terminal 2

Protective conductor to terminal 5

The Ex-d motor is fitted with a connecting cable, 5 metres in length with 5 x 0.5 mm² wires.

The wires in the connecting cable are inserted and fixed by screws in the individual terminals as follows:

Black to terminal 1

Grey to terminal 2

Brown to terminal 3

Blue to terminal 4

Protective conductor (green/yellow) to terminal 5

The two thermal fuses (non-resettable) installed in the motor are activated as a result of this termination.

Caution:

Under certain circumstances, it is possible for the motor to run without the two thermal fuses. It is however essential that this operating mode is verified and approved by an expert prior to start-up!

If the motor is to be operated without thermal fuses, it is only necessary to connect the grey wire to terminal 2, brown to terminal 3, and the protective conductor to terminal 5.

All dimensions in mm unless stated otherwise. Subject to change without prior notice. 12.16
